First exam in English

Text :

Nowadays, the world is dominated by computer technology. Some sociologists believe that, in the near future, our children could stay at home and study through **their** PC's.

The computer is a very useful device **which** helps people to solve many issues more rapidly; however, staying at home with the machine may cut off the students from their social environment. One of the worst disadvantages of the internet is that they become too dependent on it. Their social relations are no more active because of the lack of communication with others at school or university. As a result we can say that the internet is becoming epidemic for our youths, especially when they use it badly, without a close watch by **their** parents. The students already consider the internet as a brother or even their best friend.

In many cases, the internet has caused the disintegration of the family unity. In addition, the internet addicted groups harm their sight during long hours in front of the small screen. Being parents or educators, **we** are all responsible for guiding them to the right path.
